Summary

Cloud & DevOps Engineer with 1 year 10 months of experience automating infrastructure for multi-client Azure and AWS environments. Responsible for 450+ VMs and servers on a 24x7 on-call rotation; builds Terraform provisioning and Azure DevOps / GitHub Actions pipelines. Results: 40% faster AVD deployments, 70%+ less manual effort, and 25% lower monthly AWS spend. Docker, Kubernetes, and ArgoCD through project work.

Skills

Cloud: AWS (EC2, VPC, IAM, ALB, Auto Scaling, RDS, S3, CloudFront, Route 53, EKS) | Azure (AVD, VMs, Entra ID, Storage, Key Vault, VM Image Builder, AKS) | GCP (Compute Engine, VPC, Load Balancing, IAM, Vertex AI, GKE)
IaC & CI/CD: Terraform | Ansible (Configuration Management) | Azure DevOps | GitHub Actions | GitLab CI/CD | Jenkins | Git
Containers (project experience): Docker | Kubernetes | Helm | ArgoCD (GitOps)
Observability & Monitoring: Azure Monitor & Log Analytics (KQL) | Prometheus | Grafana | CloudWatch | SLIs/SLOs
Systems & Scripting: Linux Administration | PowerShell | Bash | Python | Nginx | Apache | DNS | TLS/SSL | NSG Firewall Rules
Practices: Incident Response | Root Cause Analysis (RCA) | Cost Optimization | Backup & Restore | GitHub Copilot | Claude Code

Experience

Cloud Operations Engineer (Intern, Dec 2024 – Apr 2025) | Parkar Global Technologies Pvt Ltd **Dec 2024 – Present**

- Responsible for 150+ VMs and servers (AVD session hosts, Linux and Windows) across client environments on Azure and AWS, with 24x7 on-call coverage.

Azure Virtual Desktop (AVD) Platform

- Automated new-client AVD onboarding with Terraform (host pools, session hosts, networking), Azure VM Image Builder golden-image pipelines, FSLogix profiles, and autoscaling, cutting deployment time by 40% (~8 to ~5 hrs).
- Developed Azure DevOps pipelines running Terraform and PowerShell, including Active Directory domain join and Key Vault secret handling, removing 70%+ of manual effort and cutting configuration errors to near zero across 5 clients.

AWS Infrastructure & CI/CD

- Designed and deployed a high-availability, multi-AZ WordPress platform on AWS (EC2 Auto Scaling, Application Load Balancer, RDS, S3, CloudFront) running at 99.9% uptime, codified in Terraform to recreate a full environment in under 30 minutes.
- Built an end-to-end CI/CD pipeline with GitHub Actions, Terraform, and Ansible, cutting feature delivery time by over 50%.
- Cut monthly AWS spend by 25% through right-sizing and auto-scaling while supporting 450+ concurrent VDI users.

Operations & Reliability

- Set up alerting across both clouds (Azure Monitor and Log Analytics KQL for VDI, Grafana alert rules on Prometheus, CloudWatch alarms on AWS) and tracked SLIs/SLOs, reducing mean time to resolution (MTTR) for client incidents.
- Resolved L2 escalations within SLA on the on-call rotation; contributed to RCAs, wrote runbooks, and administered Linux servers (SSH access, patching, web/app server setup).
- Debugged client-reported website issues by tracing API calls in browser DevTools and querying MongoDB; fixed data-level causes directly and escalated code defects to the development team.

Projects

DevSecOps CI/CD Pipeline - Jenkins, Maven, SonarQube, OWASP Dependency-Check, Trivy, Docker, Kubernetes

- Engineered a Jenkins pipeline with three security gates: SonarQube static code analysis, OWASP Dependency-Check for vulnerable dependencies (SCA), and Trivy container image scanning.
- Automated the build-scan-deploy flow: GitHub webhooks trigger the pipeline on every push, which builds with Maven, packages a Docker image, and deploys a 3-tier Java application to a self-managed Kubernetes cluster.

AI-Powered HR Policy Chatbot (RAG) - Python, FastAPI, LangChain, FAISS, Llama

- Implemented semantic retrieval over HR policy documents with LangChain and FAISS, plus Llama inference for answers.
- Shipped it as an internal tool that replaced manual HR lookups and keyword search, cutting policy query resolution time by ~60%.

Education

B.E. Computer Science & Engineering | The Maharaja Sayajirao University of Baroda | 73.31% 2022 – 2025
Diploma Computer Engineering | Gujarat Technological University | CGPA 8.89 2019 – 2022

Certifications & Achievements

- AWS Certified Solutions Architect – Associate (SAA-C03) | AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900) | Azure AI Fundamentals (AI-900) | Google Cloud Digital Leader
- Core Founder, Code Vimarsh (MSU) | Grew a 300+ student coding community via contests, guest lectures, and DSA sessions
- National Cadet Corps (2019 – 2022) | Letter of Appreciation – Admiral Karambir Singh, Former Chief of Indian Naval Staff
